ABOUT CONFERENCE

WCPD 2027 brings pharmaceutical scientists, clinical pharmacologists, regulatory professionals and industry researchers together in Singapore for two days.

The programme follows a compound from discovery to post-market surveillance: drug discovery and design, clinical pharmacology, pharmacogenomics and precision medicine, drug delivery systems, toxicology and safety pharmacology, biopharmaceuticals, manufacturing, regulatory science and pharmacovigilance.

What distinguishes the meeting is who is in the room. Academic, regulatory and industry perspectives appear within the same sessions, which makes it a useful venue for work that sits between disciplines. Accepted abstracts are presented as oral or poster presentations.

REASONS TO ATTEND
