ABOUT CONFERENCE

WSPR 2027 convenes physiatrists, physiotherapists, occupational therapists and rehabilitation researchers in Singapore for a two-day meeting.

Sessions cover neurorehabilitation, musculoskeletal and cardiopulmonary rehabilitation, paediatric and geriatric rehabilitation, pain management, prosthetics and orthotics, telerehabilitation, and adaptive sports and exercise medicine.

Rehabilitation is measured in function restored rather than disease resolved, which makes outcome measurement a recurring theme across the programme. Work is presented in oral and poster sessions, with contributions welcome from clinical practice as well as formal research.

REASONS TO ATTEND

- Expand Professional Networks
- Enhance Industry Visibility
- Engage with Leading Experts
- Access Valuable Insights
- Explore Emerging Trends
- Accelerate Professional Growth
- Foster Strategic Collaborations
- Showcase Research, Ideas & Expertise
