ABOUT CONFERENCE

GCNN 2027 convenes neurologists, neuroscientists, clinical researchers and healthcare professionals in Prague for two days of presentations and discussion.

Few fields have moved as quickly in recent years, and the programme follows that movement. Sessions address stroke and cerebrovascular disease, Alzheimer's disease and dementia, multiple sclerosis, Parkinson's disease and movement disorders, epilepsy, neuromuscular disease, headache medicine and neuro-oncology, together with the computational methods now applied across all of them.

Work is presented in oral and poster sessions, with the programme built to connect laboratory research and clinical practice rather than separate them.

REASONS TO ATTEND

- Expand Professional Networks
- Enhance Industry Visibility
- Engage with Leading Experts
- Access Valuable Insights
- Explore Emerging Trends
- Accelerate Professional Growth
- Foster Strategic Collaborations
- Showcase Research, Ideas & Expertise
